This book is an anthology of motorcycle stories. These 50 stories were submitted to me over a 13-year period by a wide range of motorcyclists from all walks of life. These authors tell their own personal stories of what happened to them as they rode their motorcycles. Among these writers are a few professionals who made some of their works available to me early in their careers. They now have books of their own. Some tales are very short, and some are very long. I've tried to mix them up. You may find the stories of some authors grouped together. Each tale was intensively edited to provide a good reader experience. You'll find humor, risk-taking, adventures, poetry, rhyming verse, 2-up excursions, world travelers, stupid tricks on bikes, lessons learned, winter riding perils, hazards while riding, and stories told by returning riders. I wrote five of these stories. Two of my stories relate my experiences on my motorcycle trips. Two stories are fictional children's stories that involve fantasy and motorcycles. The last story is a short fictional tale that describes an alternate world of motorcycles. Got a better original tale? Send it to me for consideration in a possible sequel.

"Martijn Doolaard traded in the convenience of a car and the distractions of daily life for a cross-continental cycling journey: a biped adventure from Amsterdam to Singapore. Leaving behind repetitive routines, One Year on a Bike indulges in slow travel, the subtlety of a gradually changing landscape, and the lessons learned through travelling. Venturing through Eastern European fields of yellow rapeseed to the intimate hosting culture in Iran, One Year on a Bike is a vivid chronicle of what can happen when the norm is pointedly replaced by exceptional self-discoveries and beautiful sceneries. Doolaard shares the gear and knowledge that made his trip possible." -- Provided by publisher.

Here is a unique book. It describes the theories and processes of repairing and adjusting the modern watch in precise and meticulous detail: a thing which has never been done so completely before in the many books on the same subject. As a text book it is a revelation. Taking nothing for granted, except the ability to read and comprehend a simple description of mechanical processes, de Carle takes his reader through every stage and every operation of watch repairing ...and to deal with them thoroughly is quite a programme - it takes 300 pages containing 24 chapters, two appendices and 553 illustrations. The fine draughtsmanship and accurate technical detail of the illustrations set a new standard. Practical Watch Repairing can justifiably claim to be the best illustrated book on practical horology yet issued, and one of the best of its kind on any subject. The publication of the book marks the beginning of a new epoch in the study of the mechanics of horology.
