Radical changes to public service delivery have swept across many regions of the world. Management accounting methods are vital to support operational and strategic decision making in public services internationally. This book provides a comprehensive and “leading-edge” guide to the topic. Written by an expert scholar with practical experience of public service delivery, the book takes account of key trends such as increased demand for public services, financial austerity, technological change and enhanced performance management. A globally relevant book, informed by cutting edge academic research and benefitting from integrated case studies, this is essential reading for both students and practitioners involved with the financial aspects of public services management.

The objective of this book is to make you a better manager by enabling you to understand and apply managerial accounting techniques effectively. The main topics are discussed in a logical order, often accompanied by an illustration of how each technique is applied. Answers to questions are given at the end of each chapter.
