CHAPTER 7 Economic Growth I. Questions for Review. 1. In the Solow growth model, a high saving rate leads to a large steady-state capital stock and a high level of steady-state output. A low saving rate leads to a small steady-state capital stock and a low level of steady-state output.

CHAPTER 7 Economic Growth I

CHAPTER 7: Economic Growth And Instability Economic Growth-how to increase the economy's productive capacity over time. Two definitions of economics growth are given. The increase in real GDP, which occurs over a period of time. The increase in real GDP per capita, which occurs over time. This definition is superior if comparison of living standards is desired. For example, China's GDP is \$744 billion compared to Denmark's \$155 billion, but per capita GDP's are \$620 and \$29,890 respectively ...
