Clinical and Experimental
Optometry, 2004 "Clinical
procedures in primary eye
care (CP) is, in my opinion,
an excellent introductory
text for all students
studying optometry,
especially those in their
formative years as students.
The authors have done a
sterling job in putting
together a text that
introduces different
examination procedures, how
to conduct or perform the
procedure.

Clinical Procedures in
Primary Eye Care Book
Review: This work describes,
in a step-by-step way, how
to perform the most commonly-
used procedures in the
primary eye care setting.
With its practical approach,
it demystifies the subject
and is a useful manual for
all students and
practitioners requiring an
introduction to diagnostic
and treatment
procedures." -- [source
