Real Food From The Ground Up

Building the country from the ground up Charles Ma is a developer who's rebuilding communities; now, he says, New Zealand as a whole needs to rebuild a society defined by unaffordable living, loneliness and alienation, homelessness, incarceration, joblessness and inaction on climate change. The task facing US President-elect Joe Biden is Herculean.

NEW YORK TIMES BESTSELLER • From the longtime CEO and chairman of Starbucks, a bold, dramatic work about the new responsibilities that leaders, businesses, and citizens share in American society today—as viewed through the intimate lens of one man's life and work. What do we owe one another? How do we channel our drive, ingenuity, even our pain, into something more meaningful than individual success? And what is our duty in the places where we live, work, and play? These questions are at the heart of the American journey. They are also ones that Howard Schultz has grappled with personally since growing up in the Brooklyn housing projects and while building Starbucks from eleven stores into one of the world's most iconic brands. In *From the Ground Up*, Schultz looks for answers in two interwoven narratives. One story shows how his conflicted boyhood—including experiences he has never before revealed—motivated Schultz to become the first in his family to graduate from college, then to build the kind of company his father, a working-class laborer, never had a chance to work for: a business that tries to balance profit and human dignity. A parallel story offers a behind-the-scenes look at Schultz's unconventional efforts to challenge old notions about the role of business in society. From health insurance and free college tuition

for part-time baristas to controversial initiatives about race and refugees, Schultz and his team tackled societal issues with the same creativity and rigor they applied to changing how the world consumes coffee. Throughout the book, Schultz introduces a cross-section of Americans transforming common struggles into shared successes. In these pages, lost youth find first jobs, aspiring college students overcome the yoke of debt, post-9/11 warriors replace lost limbs with indomitable spirit, former coal miners and opioid addicts pave fresh paths, entrepreneurs jump-start dreams, and better angels emerge from all corners of the country. From the Ground Up is part candid memoir, part uplifting blueprint of mutual responsibility, and part proof that ordinary people can do extraordinary things. At its heart, it's an optimistic, inspiring account of what happens when we stand up, speak out, and come together for purposes bigger than ourselves. Here is a new vision of what can be when we try our best to lead lives through the lens of humanity. "Howard Schultz's story is a clear reminder that success is not achieved through individual determination alone, but through partnership and community. Howard's commitment to both have helped him build one of the world's most recognized brands. It will be exciting to see what he accomplishes next."—Bill Gates

In *From the Ground Up: Local Efforts to Create Resilient Cities*, design expert Alison Sant focuses on the unique ways in which US cities are working to mitigate and adapt to climate change while creating equitable and livable communities. Sant presents 12 case studies, drawn from research and over 90 interviews with people who are working in these communities to make a difference. These efforts show how US cities are reclaiming their streets from cars, restoring watersheds, growing forests, and adapting shorelines to improve people's lives while addressing our changing climate. *From the Ground Up* is a call to action. When we make the places we live more climate resilient, we need to acknowledge and address the history of social and racial injustice. Advocates, non-profit organizations, community-based groups, and government officials will find examples of how to build alliances to support and embolden this vision together.

A leader in America's burgeoning organic garden movement describes her post-high school decision to experiment with commune life and organic farming and how the skills she learned has helped her design hundreds of rooftop, schoolyard and backyard organic gardens.

"From the Ground Up describes Rincon in detail, from the day the brainstorm to bid on the land took shape in the mid of a Perini Co. executive until its champagne-soaked opening party. . . . The book emerges as a helpful primer on what it takes to build a tiny, self-contained city. Engineering problems are cleanly explained, architectural cant is kept to a minimum and a bookshelf of financial detail is boiled down to essentials."--Marshall Kilduff, San Francisco Chronicle Book Review "This engrossing study, flavored with the appeal of San Francisco and written by Los Angeles Times national correspondent Frantz, examines the combination of dreaming and entrepreneurship required to succeed in the cyclical realty business."--Publishers Weekly "Frantz. . . is a business reporter of real skill and sophistication. . . .The genius of [his] book is in the details."--Johnathan Kirsch, Los Angeles Times

Selection of the Executive Program Book Club For any manager or executive who's had it with quick-fix approaches to organizational transformation, here's a proven approach that lasts. In this paperback edition of the best-selling original work, management expert Ed Lawler presents six principles--and plenty of practical guidance--for overhauling an enterprise from bottom to top and bringing it into alignment with the realities of today's marketplace. Don't fall for yet another silver-bullet solution. This is the definitive approach to making the kind of substantive changes that will bolster your company's competitive stance, now and for years to come.

Rome is not one city but many, each with its own history unfolding from a different center: now the trading port on the Tiber; now the Forum of antiquity; the Palatine of imperial power; the Lateran Church of Christian ascendancy; the Vatican; the Quirinal palace. Beginning with the very shaping of the ground on which Rome first rose, this book conjures all these cities, past and present, conducting the reader through time and space to the complex and shifting realities--architectural, historical, political, and social--that constitute Rome. A multifaceted historical portrait, this richly illustrated work is as gritty as it is gorgeous, immersing readers in the practical world of each period. James H. S. McGregor's explorations afford the pleasures of a novel thick with characters and plot twists: amid the life struggles, hopes, and failures of countless generations, we see how things truly worked, then and now; we learn about the materials of which Rome was built; of the Tiber and its bridges; of roads, aqueducts, and sewers; and, always, of power, especially the power to shape the city and imprint it with a particular personality--like that of Nero or Trajan or Pope Sixtus V--or a particular institution. McGregor traces the successive urban forms that rulers have imposed, from emperors and popes to national governments including Mussolini's. And, in archaeologists' and museums' presentation of Rome's past, he shows that the documenting of history itself is fraught with power and politics. In McGregor's own beautifully written account, the power and politics emerge clearly, manifest in the distinctive styles and structures, practical concerns and aesthetic interests that constitute the myriad Romes of our day and days past.

This book invites the reader to understand our Universe, not just marvel at it. From the clock-like motions of the planets to the catastrophic collapse

of a star into a black hole, gravity controls the Universe. Gravity is central to modern physics, helping to answer the deepest questions about the nature of time, the origin of the Universe and the unification of the forces of nature. Linking key experiments and observations through careful physical reasoning, the author builds the reader's insight step-by-step from simple but profound facts about gravity on Earth to the frontiers of research. Topics covered include the nature of stars and galaxies, the mysteries of dark matter and dark energy, black holes, gravitational waves, inflation and the Big Bang. Suitable for general readers and for undergraduate courses, the treatment uses only high-school level mathematics, supplemented by optional computer programs, to explain the laws of physics governing gravity.

Analyzes contemporary armed conflict from the point of view of a British infantry officer with experience on the battlefield; considers the concepts involved and the blurring of military and political activity that has challenged the distinction between war and peace.

Built by hand. Built to last. The best dreams start with love. Noell Jett's home is more than a farmhouse. It's a testament to overcoming challenges, working side by side with those you love, and learning to say yes to your dreams again and again, even when the world says no. Growing up in poverty, in a family with extremist religious beliefs, Noell Jett knows what it's like to work hard to survive. When she married Daniel and they began a family together, she discovered the joy of working hard to achieve her dreams. In *From the Ground Up*, Noell shares the unbelievable story behind her 3,700-square foot custom farmhouse—built by hand and savvy influencer marketing—and the key strategies she learned about never giving up. With beautiful photos, reflections questions, and Noell's trademark DIY tips, *From the Ground Up* offers a vision for living beyond the confines of your past, inspiration for home renovation on a budget, tricks to make influencer marketing work for you, spiritual insight into finding true freedom, and encouragement to take that life-changing leap of faith. *From the Ground Up* is a powerful reminder that following your passion is worth a few sacrifices along the way. After all, some dreams are worth giving it all you've got. Why not follow yours?

Presents case studies of grassroots activism for environmental justice, highlighting struggles against environmental hazards, toxic waste dumps, and polluting factories which often impact low-income and minority communities.
