“ If you read one debut novel in 2022, this should be it. ” —Los Angeles Times Named a Most Anticipated Book of the Year by Entertainment Weekly, Vulture, Harper's Bazaar, BuzzFeed, Ms. Magazine, Lit Hub, The Millions, and Electric Literature In the bustling streets and cloistered homes of Lagos, a cast of vivid characters—some haunted, some defiant—navigate danger, demons, and love in a quest to lead true lives. As in Nigeria, vagabonds are those whose existence is literally outlawed: the queer, the poor, the displaced, the footloose and rogue spirits. They are those who inhabit transient spaces, who make their paths and move invisibly, who embrace apparitions, old vengeance and alternative realities. Eloghosa Osunde's brave, fiercely inventive novel traces a wild array of characters for whom life itself is a form of resistance: a driver for a debauched politician with the power to command life and death; a legendary fashion designer who gives birth to a grown daughter; a lesbian couple whose tender relationship sheds unexpected light on their experience with underground sex work; a wife and mother who attends a secret spiritual gathering that shifts her world. As their lives intertwine—in bustling markets and underground clubs, churches and hotel rooms—vagabonds are seized and challenged by spirits who command the city's dark energy. Whether running from danger, meeting with secret lovers, finding their identities, or vanquishing their shadowselves, Osunde's characters confront and support one another, before converging for the once-in-a-lifetime gathering that gives the book its unexpectedly joyous conclusion. Blending unvarnished realism with myth and fantasy, Vagabonds! is a vital work of imagination that takes us deep inside the hearts, minds, and bodies of a people in duress—and in triumph.

In this eye-opening book, Lorenzo Fioramonti provides a much-needed critique of the current 'data fever', showing both the direct consequences and indirect implications of the increasing power of numbers. At the same time, it investigates innovative attempts to resist the invasion of mainstream statistics by providing alternative measurements or rejecting quantification altogether. An innovative and timely exposé of the politics, power and contestation of numbers in everyday life.

The existing theories on the evolution of senescence assume that senescence is inevitable in all organisms. However, recent studies have shown that this is not necessarily true. A better understanding of senescence and its underlying mechanisms could have far-reaching consequences for conservation and eco-evolutionary research. This book is the first to offer interdisciplinary perspectives on the evolution of senescence in many species, setting the stage for further developments. It brings together new insights from a wide range of scientific fields and cutting-edge research done on a multitude of different animals (including humans), plants and microbes, giving the reader a complete overview of recent developments and of the controversies currently surrounding the topic. Written by specialists from a variety of disciplines, this book is a valuable source of information for students and researchers interested in ageing and life history traits and populations.

This book is a collection of papers presented at XIV International Scientific Conference “ INTERAGROMASH 2021 ” , held at Don State Technical University, Rostov-on-Don, Russia, during 24–26 February 2021. The research results presented in this book cover applications of unmanned aerial systems, satellite-based applications for precision agriculture, proximal and remote sensing of soil and crop, spatial analysis, variable-rate technology, embedded sensing systems, drainage optimization and variable rate irrigation, wireless sensor networks, Internet of things, robotics, guidance and automation, software and mobile apps for precision agriculture, decision support for precision agriculture and data mining for precision agriculture.

Describes special forest products that represent opportunities for rural entrepreneurs to supplement their incomes. Includes: aromatics, berries & wild fruits, cones & seeds, forest botanicals, honey, mushrooms, nuts, syrup, & weaving & dying materials. Each chapter describes market & competition considerations, distribution & packaging, equipment needs, & resource conservation considerations, & also presents a profile of a rural business marketing the products. Products suitable for small or part-time operators are described. 50 photos.

This two-volume set (CCIS 955 and CCIS 956) constitutes the refereed proceedings of the Second International Conference on Advanced Informatics for Computing Research, ICAICR 2018, held in Shimla, India, in July 2018. The 122 revised full papers presented were carefully reviewed and selected from 427 submissions. The papers are organized in topical sections on computing methodologies; hardware; information systems; networks; security and privacy; computing methodologies.
