Corwin's acclaimed Laboratory Manual for Introductory Chemistry offers a proven format of a pre-laboratory assignment, a stepwise procedure, and a post-laboratory assignment. More than 500,000 students to date in Introductory Chemistry, Preparatory Chemistry, and Allied Health Chemistry have used these experiments successfully. The 7th Edition continues to evolve with increased sensitivity to environmental and safety concerns in the laboratory. Recycle icons in the margin of each procedure alert students to recycle chemical waste and "green chemical" indicators remind students to use the appropriate waste containers provided to dispose of chemicals. Corwin's lab manual can be packaged with any Pearson Intro Prep Chemistry book.

With an expanded focus on critical thinking and problem solving, the new edition of Introductory Chemistry: Concepts and Critical Thinking prepares readers for success in introductory chemistry. Unlike other introductory chemistry texts, all materials – the textbook, student solutions manual, laboratory manual, instructor's manual and test item file – are written by the author and tightly integrated to work together most effectively. Math and problem solving are covered early in the text; Corwin builds reader confidence and ability through innovative pedagogy and technology formulated to meet the needs of today's learners.

This lab manual helps students develop data acquisition, organization, and analysis skills while teaching basic techniques. Students construct their own data tables, answer conceptual questions, and make predictions before performing experiments. They also have the opportunity to visualize and describe molecular level activity and explain the results.
