This book examines the role of the inspector within the context of a number of OECD member states and explores the ways in which the inspectors themselves interpret, implement and influence inspection practices and policy. Inspection policy can have various unintended consequences, some of which produce radical discrepancies between the policy intent and its implementation. A number of these discrepancies derive from the way in which the policy is articulated while others derive from the ways in which inspectors interpret and operationalise this policy. This implementation is coloured and conditioned by several factors, including the evidence on which inspectors base their judgements; what counts as evidence in different policy contexts; what counts as valid knowledge in inspection processes; the qualities needed by inspectors working in differing policy contexts and the identities that they adopt in order to successfully carry out their work. The book provides a valuable contribution to our understanding of the politics and practices which colour and shape the legitimacy and operational execution of inspection policy. The work is unique in its focus on the inspectors' role within the implementation of the inspection process— an element often overlooked in the literature. It also includes two chapters co-written by inspectors, offering unique insights into their life worlds and identities.

This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

How to ensure educational equality, rights to cultural maintenance and full social participation of minority groups, while ensuring social harmony and national development within a democratic society, is a major challenge for education policy-makers. Traditionally, this is viewed as a debate for pedagogues. Nevertheless, there are important implications for educational planners and managers. Given the many varied patterns of ethnic diversity within individual societies and their different educational traditions, no one set of educational responses is universally applicable. However, as discussed in the booklet, there are certain readily identifiable processes to follow in developing responses to cultural diversity. The three main foci of policy responses put forward are: the organisation and structures of education; curricula, pedagogy and choice of language; and relations between the school and the community.
