Perspectives on Learning and Memory -  
Google Books

Memory is one of the most fundamental  
mental processes. Neuroscientists study  
this process by using extremely diverse  
strategies. Two different approaches aimed  
at understanding learning and memory  
were introduced in this symposium. The  
first focuses on the roles played by synaptic  
plasticity, especially in long-term  
depression in the cerebellum in motor  
learning, and its regulatory mechanism.
