The Second Amendment of the United States Constitution reads: "A well regulated Militia, being necessary to the security of a free State, the right of the people to keep and bear Arms, shall not be infringed." A well regulated Militia, being necessary to the security of a free State, the right of the people to keep and bear Arms, shall not be infringed. In the United States, which has an English common law tradition, the concept of a right to keep and bear arms was recognized prior to the creation of a written national constitution.

States— “ An essential read for our times ” (Ammoland Shooting Sports News). David A. Keene and Thomas Mason examine the fight over the Second Amendment using polls, studies, and numbers. The pro-gun advocates detail the numerous and contentious battles debated in the courts, Congress and by state legislatures all over the country, as well as in the news and the United Nations. Shall Not Be Infringed tells of how the right to bear arms has become such a hot button topic and how shifts in governmental paradigms have altered the conversation. In these pages, the authors offer crucial conservative analysis on the significance of the Second Amendment and its guarantees.

We are all born with unalienable rights that are given to us by God. The people authorized and formed governments to

protect our rights. Instead our governments have attacked our rights in a quest for power not granted to them. This book is about our right to defend ourselves and those we love from those who would harm us, be it other people or governments, even our own. This book is direct and to the point and thus not a long-winded work. It is directed to the people of Ohio specifically and its government. Unconstitutional laws restricting our unalienable rights must not be allowed to stand. This book clearly points out the abuse imposed on us by our government and a call to correct it.

There are certainly some weapons, like a nuclear bomb, that the public should not own. The tough thing is deciding where to draw the line. This is currently of great debate in American politics. Stephen P. Halbrook's *The Founders' Second Amendment* is the first book-length account of the origins of the Second Amendment, based on the Founders' own statements as found in newspapers, correspondence, debates, and resolutions. Mr. Halbrook investigates the period from 1768 to 1826, from the last years of British rule and the American Revolution through to the adoption of the Constitution and the Bill of Rights, and the passing of the Founders' generation. His book offers the most comprehensive analysis of the arguments behind the drafting and adoption of the Second Amendment, and the intentions of the men who created it.

More gun control? The politicians come up with a myriad of crazy solutions, but continue to ignore the problem. There are plenty of gun laws on the books, good ones, but they are not fully enforced. Add a thousand more laws and regulations, yet it will do nothing more than keep good honest citizens from legally being able to protect themselves. On the other hand, criminals and illegal aliens are armed with all sorts of firearms, laws or not. The bigger picture is simply this, the federal government does Not have the constitutional right to restrict or regulate our firearms. Yet, our rights as private citizens are greatly restricted by many federal laws. If the founding Fathers could only see how much we have shredded our county's establishment, they would call for another revolution. These are perilous

times, and sadly, with every disastrous or horrific event, "We the People" eagerly surrender more and more of our freedoms to the central government. The 2nd Amendment reads: "A well regulated Militia, being necessary to the security of a free State, the right of the people to keep and bear Arms, shall not be infringed". The government, the federal government at least, is not to limit or restrict this right. It is most closely related to the 1st Amendment of free speech because the people have the right to speak out against the government, and to assemble (peacefully). Also the 2nd is closely associated with the 4th and 5th, as the people have the rights to own property and not be subject to search and seizure without due process. Yet in the emotional frenzy that follows every tragic shooting incident, members of Congress cry out for ever more gun restrictions and even

confiscation. Rather, Congress needs to fix the NCIC database, address mental illness, and enforce the immigration laws. If we are a nation of laws, then our politicians need to serve the people instead of playing politics. The point of this book is to alert and remind ourselves that we are a nation of laws, and that we as citizens have rights and freedoms guaranteed to us by our founding document, the Constitution.

Rather than get into the "nuts and bolts" of the laws and proposed ideas of what and how new and old regulations work, my intent is to suggest that our "inalienable rights" are being squashed. We, as a free people, need to educate ourselves, and determine for ourselves where and which way we want our governing leaders to guide us. It is through the power of your vote, which is your voice, to elect those leaders that uphold your values and traditions. There are a number of ideas

and topics discussed that I hope to inspire you to learn more, and inspire you to do something (at least vote). There was a humorous but pointed story that is greatly appropriate. "A bunch of sheep were happily grazing in the field, enjoying the comforts of their lives. A wolf came out of the woods and killed one of the sheep. In a panic, they formed a consensus on what to do. They decided the best way to keep themselves safe was to remove all of their teeth. Later, the wolf came back and killed them all." Get the picture?

While the U.S. Constitution is brilliant, do all of its 18th-Century notions make sense in a modern world? Specifically, should the right to keep and bear arms apply to today's relentlessly violent society where mentally and emotionally disturbed individuals make headlines everyday by killing people in mass with high-powered ,

modernized weaponry? In an objective way, we explore the original application of the Second Amendment, as well as how the United State's courts have defined it through the years. The original Constitution, which 39 state delegates signed on September 17, 1787, after a four-month long Constitutional Convention, made it clear that any newly formed Federal Government of the United State of America would have limited powers. While the original Constitution expressed the notion of limited power within the Federal Government, it provided few specific rights and liberties for the people. Without these individual rights attached to the Constitution, many state delegates believed that a strong Federal Government could potentially abuse its citizens by denying them basic rights. These delegates, called Anti-Federalists, were led by Virginia's Patrick

Henry, who did not sign the original Constitution and demanded a Bill of Rights for the people, refusing to support ratification of the document without amendments attached to it. Reluctantly, the Federalists led by Virginia delegate James Madison, the Father of the Constitution, being its primary writer, and New York delegate Alexander Hamilton agreed to the amendments in order to complete ratification. The Federal Government of the United States under the U.S. Constitution began operation on March 4, 1789, and on September 25, 1789, the first Congress adopted 12 amendments to the Constitution. In 1791, the states ratified 10 of those amendments. altogether clear in the eyes of many. The ambiguity of their relationship to one another has created division in the years since ratification. Additionally, the American populace has tested both ideas as separate entities through the years because of the amendments simple phrasing and lack of elaboration.

Therefore, interpretations of the amendment are vast, and its place within the context of today's society adds to the complexity of the 27 words that make up Amendment II, which read: "A well regulated Militia, being necessary to the security of a free State, the right of the people to keep and bear Arms, shall not be infringed." The Second Amendment (Amendment II) to the United States Constitution protects the right of the people to keep and bear arms and was adopted on December 15, 1791, as part of the first ten amendments contained in the

Bill of Rights. The Supreme Court of the United States has ruled that the right belongs to individuals, while also ruling that the right is not unlimited and does not prohibit all regulation of either firearms or similar devices. State and local governments are limited to the same extent as the federal government from infringing this right per the incorporation of the Bill of Rights. The Second Amendment was based partially on the right to keep and bear arms in English common law and was influenced by the English Bill of Rights of 1689. Sir William Blackstone described this right as an auxiliary right, supporting the natural rights of self-defense, resistance to oppression, and the civic duty to act in concert in defense of the state. In the twenty-first century, the amendment has been subjected to renewed academic inquiry and judicial interest, and debate
