~~SMART Goals in Physical and Occupational Therapy: Overview ...~~

Let's break these down from an occupational therapy perspective. S- Specific. Often times, it seems simple enough to create a specific goal; however, without being specific about the academic or functional progress you would like to see, you are unable to also make this goal MEASURABLE (which is the next part).

Goal setting can take much time and still be vague. A practical and standardized method is needed for being specific. Method: A novel approach to writing specific, measurable, achievable, realistic/ relevant and timed (SMART) goals is developed here.

Each goal can be built up by using up to four parts: the target activity, the support needed, quantification of performance and the time period to achieve the desired state.

When you approach goal writing with this formula, you can reduce the time spent writing Physical Therapy and Occupational Therapy goals, by 15 to 30 seconds each. That may not seem like a lot of time, but if you see 3 new patients in a day and write out 5 short term goals and 5 long term goals, you are producing at least 30 new goals.

Writing measurable Individualized Education Program (IEP) goals is an essential part of our role as school-based occupational therapists. The goals we include in our students' IEPs will guide their OT services for the IEP year. Taking time to ensure that each OT IEP goal meets the needs of the student is vital for success in occupational therapy.
