## ~~Sound Design, Mixing, and Mastering with Ableton Live ...~~

The first term, mixing, refers to the process of putting multiple layers of audio together to make one final track, or to musically modify an existing track. The second term, mastering, refers to the process of optimizing the final track using all sorts of different mastering elements such as compression, equalization, stereo enhancement and more.

# File Type PDF Sound Design Mixing And Mastering With Ableton Live 9 Quick Pro Guides

Mixing is the start of post-production for an audio producer and their song. An audio producer will balance out the individual tracks to make a cohesive song. An audio producer will use EQ, compression, panning and reverb to reduce the incompatibility between tracks. Mastering on the other hand is the process of making playback quality optimal.
