Levelling ( or Leveling) is a branch of surveying, the object of which is: i) to find the elevations of given points with respect to a given or assumed datum, and ii) to establish points at a given or assumed datum. The first operation is required to enable the works to be designed while the second operation is required in the setting out of all kinds of engineering works.

What is levelling? - Surveying & Levelling

Levelling is the most widely used method of obtaining the elevations of ground points relative to a reference datum and is usually carried out as a separate procedure to those used in fixing planimetric position. The basic concept of leveling involves the measurement of vertical distance relative to a horizontal line of sight.

Surveying and Levelling - BASAK - Google Books

Surveying or land surveying is the technique, profession, art, and science of determining the terrestrial or three-dimensional positions of points and the distances and angles between them. A land surveying professional is called a land surveyor. These points are usually on the surface of the Earth, and they are often used to establish maps and boundaries for ownership, locations, such as the ...

Surveying - Wikipedia

NY Land Surveyor, PC. is a professional land surveying company. NY Land Surveyor works along the guidelines of the code of practice of New York State Land Surveyors. For us, every survey is treated more than a "file of maps" because each map involves a real situation, real property and real people.

About - NY Land Surveyor P.C.
