Bypassing processing – Noise reduction and sharpening are skipped when producing CR2 image files.. Parameter control – Raw photographs allow users the freedom to manipulate white balance, hue, lightness, and other parameters. When working with JPEG files, only preset values are available. Lossless files – compressed JPEG sacrifices quality to make the image files smaller.

The IEC prefix "CR" denotes lithium manganese dioxide chemistry. Since LiMnO 2 cells produce 3 volts there are no widely available alternative chemistries for a lithium coin battery. The "BR" prefix indicates a round lithium/carbon monofluoride cell. See lithium battery for discussion of the different performance characteristics.

The .cr2, which stands for Canon RAW 2 nd edition, is a file extension. A file extension is the three or four letters after a filename and a period that tells the operating system what application to use to open the file. For example, you might see something like 7Q9A0001.cr2. The ".cr2" is Canon's way of stamping its trademark on a file.
