A leading M.I.T. social scientist and consultant examines five professions—engineering, architecture, management, psychotherapy, and town

planning—to show how professionals really go about solving problems.

A leading M.I.T. social scientist and consultant examines five professions - engineering, architecture, management, psychotherapy, and town planning - to show how professionals really go about solving problems. The best professionals, Donald Schön maintains, know more than they can put into words. To meet the challenges of their work, they rely less on formulas learned in graduate school than on the kind of improvisation learned in practice. This unarticulated, largely unexamined process is the subject of Schön's provocatively original book, an effort to show precisely how 'reflection-in-action' works and how this vital creativity might be fostered in future professionals.

A leading M.I.T. social scientist and consultant examines five professions - engineering, architecture, management, psychotherapy, and town planning - to show how professionals really go about solving problems. The best professionals, Donald Schön maintains, know more than they can put into words. To meet the challenges of their work, they rely less on formulas learned in graduate school than on the kind of improvisation learned in practice. This unarticulated, largely unexamined process is the subject of Schön's provocatively original book, an effort to show precisely how 'reflection-in-action' works and how this vital creativity might be fostered in future professionals.

Building on the concepts of professional competence that he introduced in his classic *The Reflective Practitioner*, Schon offers an approach for educating professional in all areas that will prepare them to handle the complex and unpredictable problems of actual practice with confidence, skill, and care.

The Creative Reflective Practitioner explores research and practice through the eyes of people with a wholehearted commitment to creative work. It reveals what it means to be a reflective creative practitioner, whether working alone, in collaboration with others, with digital technology or doing research, and what we can learn from listening and observing closely. It gives the reader new insights into the fascinating challenge that having a reflective creative mindset can bring. Creative reflective practice is seen through practitioner ideas and works which have informed the writing at every level, supported by research studies and historical accounts. The practitioners featured in this book represent a broad spectrum of interdisciplinary creative activities producing works in film, music, drama, dance and interactive installations. Their work is innovative, full of new ideas and exciting to experience, offering engagement and challenge for audiences and participants alike. Practitioner interviews give a direct sense of how they see creative practice from the inside. The ways in which these different situations of practice stimulate and facilitate reflection in practice and how we can learn from this are described. Variations of reflective practice are discussed that extend the original concepts proposed by Donald Schön, and a contemporary dimension is added through the role of the digital in creative reflective practice as a tool, mediator, medium and partner. This book is relevant to people who wish to understand creativity and reflection in practice and how to learn from the practitioners themselves. This includes researchers in any discipline as well as students, arts professionals and practitioners such as artists, curators, designers, musicians, performers, producers and technologists.

Based on a research project by the Space Organization Research Group, this text explores how to impact work processes through workspace. It takes a strategic look at how people work and how organizations evolve organically, blending workstyle, process and workspace.

Lance Edison, a soccer player, feels like his life is finally coming together when he gets drafted into the professional soccer league. As he attempts to settle in his new city and focus on his career a familiar face appears expectantly. Does he take a chance on love? Zoe Andrews, a waitress, was excited about receiving her marketing degree. This waitress turn marketing executive is offered her dream job that requires her to move. She thinks she finally finds balance in life. She never expected to have an old customer as a new client. The joy and passion of navigating a new relationship becomes dampened when lies and deceit from one of their past starts to tear at the new found trust they have begun to build with each other. Will they be able put their past behind them to work together toward the same goal?

Since the publication of Donald Schön's *The Reflective Practitioner* in 1983 there has been a dramatic growth of research and writing developing the concept of reflective learning. Surprisingly, there has been little application of concepts of reflective learning to social work education. This volume: ¢ makes accessible for the first time to a social work readership a book which focuses on reflective learning in social work ¢ brings together material on reflective learning from both academic and practice settings ¢ creates a seminal text for educators and trainers in universities and practice settings ¢ has relevance to an international readership, with contributions from the UK, USA, Canada and Australia.

Why are controversies about such issues as abortion, welfare, persistent poverty, and environmental destruction so intractable? As anyone who has ever engaged in or tried to settle an argument on highly charged issues knows, facts rarely persuade in such situations. This innovative approach to intractable policy controversies shows how "reframing" the issues can succeed where simply appealing to facts often fails. In *Frame Reflection*, two of his country's leading organizational theorists and policy analysts show how disputes that in abstract debate or negotiation seem insoluble can sometimes be resolved pragmatically by those who actually have to design and implement the specific programs. The authors illustrate their theory through a detailed examination of three specific programs: the evolution of early retirement programs in Germany; a statewide project for the homeless in Massachusetts; and the development of Project Athena, a large-scale experiment in the use of computers in undergraduate education at MIT. Policy stalemates are inevitable. Yet we know that people sometimes do change their minds, even in situations that at first appeared hopeless. How that happens is the subject of this pathbreaking book.
