Have you ever wondered why diets just don't seem to work? In Yuktahaar, award-winning nutritionist Munmun Ganerival argues that the reason why none of the diets in the past have seemed to work is because they focused on the wrong cause-you, the reader. While we may continue to have a fling with low carb, vegan, low fat diets and everything in between but a long-lasting solution may never be found if we do not shift our focus from 'you' to 'them'-the human-gut microbiome connection. Nearly all chronic issues are rooted in an imbalanced microbiome. Disruption in the balance of your belly-based microscopic community not only causes weight gain and increases the risk of chronic diseases but also impacts our mood, behavior, happiness, and a general sense of well-being. In this book, Munmun gives an actionable 10-week holistic program that encourages a gut balancing lifestyle, consisting of season-wise meal plans, recipes, exercise routines, sleep hygiene tips, and yoga practice. The book also charts actress Taapsee Pannu's phenomenal physical transformation while working with Munmun. With a focus on combining traditional, regional Indian foods with evidence-backed tips, Yuktahaar will transform your relationship with food and rebalance your gut for a leaner and healthier you.

Morgan didn't mean to do anything wrong that day. Actually, she meant to do something right. But her kind act inadvertently played a role in a deadly tragedy. In order to move on, Morgan must learn to forgive-first someone who did something that might be unforgivable, and then, herself. But Morgan can't move on. She can't even move beyond the front door of the apartment she shares with her mother and little brother. Morgan feels like she's underwater, unable to surface. Unable to see her friends. Unable to go to school. When it seems Morgan can't hold her breath any longer, a new boy moves in next door. Evan reminds her of the salty ocean air and the rush she used to get from swimming. He might be just what she needs to help her reconnect with the world outside. Underwater is a powerful, hopeful debut novel about redemption, recovery, and finding the strength it takes to face your past and move on.

You can't have a happy family unless you're happy yourself. Raageshwari Loomba, an award-winning speaker on mindfulness, shows us how to create an excellent atmosphere for the entire family to thrive in. Her relatable style is coupled with real-life examples, such as that of Albert Einstein, who couldn't speak till the age of four and was a poor student. His parents encouraged him with love and allowed him to learn at his own pace. This, she shows, is the way to bring up your own little genius. Building a Happy Family brings to you 11 simple mindfulness philosophies that will enrich and strengthen your and your children's inner world. Through scientific research and her own intimate story of heartbreak and facial paralysis, Raageshwari emphasises how our thoughts can manifest further struggles or glory, and how teaching children early that our inner world attracts our outer world is key. Parents are taught to encourage their children's original expressions, creativity and joy, and not lose sight of it in their own lives too. This is the secret to a happy family.

In this ambitious successor to The Great Derangement, acclaimed writer Amitav Ghosh finds the origins of our contemporary climate crisis in Western colonialism's violent exploitation of human life and the natural environment. A powerful work of history, essay, testimony, and polemic, Amitav Ghosh's new book traces our contemporary planetary crisis back to the discovery of the New World and the sea route to the Indian Ocean. The Nutmeg's Curse argues that the dynamics of climate change today are rooted in a centuries-old geopolitical order constructed by Western colonialism. At the center of Ghosh's narrative is the now-ubiquitous spice nutmeg. The history of the nutmeg is one of conquest and exploitation of both human life and the natural environment. In Ghosh's hands, the story of the nutmeg becomes a parable for our environmental crisis, revealing the ways human history has always been entangled with earthly materials such as spices, tea, sugarcane, opium, and fossil fuels. Our crisis, he shows, is ultimately the result of a mechanistic view of the earth, where nature exists only as a resource for humans to use for our own ends, rather than a force of its own, full of agency and meaning. Writing against the backdrop of the global pandemic and the Black Lives Matter protests, Ghosh frames these historical stories in a way that connects our shared colonial histories with the deep inequality we see around us today. By interweaving discussions on everything from the global history of the oil trade to the migrant crisis and the animist spirituality of Indigenous communities around the world, The Nutmeg's Curse offers a sharp critique of Western society and speaks to the profoundly remarkable ways in which human history is shaped by non-human forces.
