Vectorworks files: The default method in the Vectorworks Design Series products is to create a design layer viewport and then reference the desired design layers from the master file into the viewport, as described here. One advantage to this method is that all of the layers, classes, and resources from the master file are not automatically imported into the target file.

Vectorworks for Entertainment Design is the first book in the industry tailored for the entertainment professional. This second edition has been extensively revised and updated, covering the most current details of the Vectorworks software for scenery, lighting, sound, and rigging. With a focused look at the production process from ideation to development to documentation required for proper execution, the book encourages readers to better create their own processes and workflows through exercises that build on one another. This new edition introduces Braceworks, SubDivision modeling, and scripting using the Marionette tool, and covers new tools such as Video Camera, Deform Tool, Camera Match, Schematic Views, and Object Styles. Fully illustrated with step-by-step instructions, this volume contains inspirational and aspirational work from Broadway, Concerts, Regional Theatre, Dance, and Experiential Entertainment. Exploring both the
