Teacher's Need To Know About The Emerging Science Of Differences account of the dismal state of parenting today, and a vision for how we can better prepare our children for the challenges of the adult world In

The Collapse of Parenting, internationally acclaimed author Leonard Sax argues that rising levels of obesity, depression, and anxiety among young people can be traced to parents abdicating their authority. The result is children who have no standard of right and wrong, who lack discipline, and who look to their peers and the Internet for direction. Sax shows how parents must reassert their authority - by limiting time with screens, by encouraging better habits at the dinner table, and by teaching humility and perspective - to renew their relationships with their children. Drawing on nearly thirty years of experience as a family physician and

psychologist, along with hundreds of interviews with children, parents, and teachers, Sax offers a blueprint parents can use to help their children thrive in an increasingly complicated world.

Young women are at risk today. In *Girls on the Edge*, Dr. Leonard Sax shares stories of girls who look confident and strong on the outside but are fragile within. He shows why a growing proportion of teen and tween girls are confused about their sexual identity and obsessed with grades or Facebook. Sax provides parents with tools to help girls become confident women, along with practical tips on helping your daughter choose a sport, nurturing her spirit through female-centered activities, and more.

Why America's sons are underachieving, and what we can do about it. Something is happening to boys today. From kindergarten to college, American boys are, on average, less resilient and less ambitious than they were a mere twenty years ago. The gender gap in college attendance and graduation rates has widened dramatically. While Emily is working hard at school and getting A's, her brother Justin is goofing off. He's more concerned about getting to the next level in his videogame than about finishing his homework. In *Boys Adrift*, Dr. Leonard Sax delves into the scientific literature and draws on more than twenty years of clinical experience to explain why boys and young men are failing in school and disengaged at home. He shows how social, cultural, and

biological factors have created an environment that is literally toxic to boys. He also presents practical solutions, sharing strategies which educators have found effective in re-engaging these boys at school, as well as handy tips for parents about everything from homework, to videogames, to medication.

An economic way of thinking about the gender issues confronting women around the world Gender matters in economics—for even with today's technology, fertility choices, market opportunities, and improved social norms, economic outcomes for women remain markedly worse than for men. Drawing on insights from feminism, postmodernism, psychology, evolutionary biology, Marxism, and politics, this textbook

Provides a rigorous economic look at issues confronting women throughout the world—including nonmarket scenarios, such as marriage, family, fertility choice, and bargaining within households, as well as market areas, like those pertaining to labor and credit markets and globalization. Mukesh Eswaran examines how women's behavioral responses in economic situations and their bargaining power within the household differ from those of men. Eswaran then delves into the far-reaching consequences of these differences in both market and nonmarket domains. The author considers how women may be discriminated against in labor and credit markets, how their family and market circumstances interact, and how globalization has influenced their

Tives. Eswaran also investigates how women have been empowered through access to education, credit, healthcare, and birth control; changes in ownership laws; the acquisition of suffrage; and political representation. Throughout, Eswaran applies sound economic analysis and new modeling approaches, and each chapter concludes with exercises and discussion questions. This textbook gives readers the necessary tools for thinking about gender from an economic perspective. Addresses economic issues for women throughout the world, in both developed and developing countries Looks at both market and nonmarket domains Requires only a background in basic economic principles Includes the most recent research on the economics of gender in a range of

A guide that helps parents focus on their children's unique strengths and inclinations rather than on gendered stereotypes to more effectively bring out the best in their individual children, for parents of infants to middle schoolers. Reliance on Gendered Stereotypes Negatively Impacts Kids Studies on gender and child development show that, on average, parents talk less to baby boys and are less likely to use numbers when speaking to little girls. Without meaning to, we constantly color-code children, segregating them by gender based on their presumed interests. Our social dependence on these norms has far-reaching effects, such as leading girls to dislike math or

Increasing aggression in boys. In this practical guide, developmental psychologist (and mother of two) Christia Spears Brown uses science-based research to show how over-dependence on gender can limit kids, making it harder for them to develop into unique individuals. With a humorous, fresh, and accessible perspective, *Parenting Beyond Pink & Blue* addresses all the issues that contemporary parents should consider—from gender-segregated birthday parties and schools to sports, sexualization, and emotional intelligence. This guide empowers parents to help kids break out of pink and blue boxes to become their authentic selves.

"Emily Kane shows clearly that most parents understand children's

File Type PDF Why Gender Matters What Parents And

personality to be some combination of nature and nurture, and many wish they could help nurture their children to escape gender traps. Yet these parents are themselves trapped by the gender structure itself, especially the accountability they feel to other people's expectations, and the fear that if their boys are free to explore activities usually associated with girls they will be punished by the world around them. The author shows clearly that to help parents navigate childrearing, we have to change the world around them. A good read, perfect for the undergraduate classroom, and clear enough even to give to those new parents in your family or the neighborhood."--Cover.
